To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and other information can be found in the Fund's prospectus, which may be obtained by calling 1-855-355-4RSQ (4777). Read the prospectus carefully before investing or sending money. Mutual fund investing involves risk, including possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, differences in generally accepted accounting principles, or from social, economic, or political instability in other nations. Emerging markets and small cap holdings involve heightened risk related to the same factors, as well as increased volatility and lower trading volume. REIT investments are subject to changes in economic conditions, credit risk and interest rate fluctuations. The fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses. The use of leverage by the fund managers may accelerate the velocity of potential losses.

The benchmark is the **MSCI ACWI Ex-US NR Index®**, a free float-adjusted market-capitalization weighted index designed to measure equity market performance in the global developed and emerging markets, excluding the US. **Alpha** measures the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta). Alpha is often seen as a measure of the value added or subtracted by a portfolio manager.
